Professional Summary

Final-year Computer Engineering student and Web Developer with hands-on experience building responsive, full-stack web applications using the MERN stack. 1st Place winner, CVM University Hackathon 4.0 - 2026, with proven experience delivering production-grade, role-based platforms, real-time features. Quick learner with strong problem-solving and team collaboration skills, seeking a challenging Web Developer role to deliver high-quality digital solutions.

Education

Madhuben & Bhanubhai Patel Institute of Technology, CVM University — **2023 – 2027**
B.Tech, Computer Engineering — CGPA: 7.95/10 — *Gujarat*

R.P.T.P.Science Stream — **2023**
Higher Secondary School — 59% — *Gujarat*

Maganbhai Umedbhai Patel Technical School — **2021**
Secondary School — 75.67% — *Gujarat*

Experience

HP Param IT Solutions — **May 15 – June 13, 2026**
Web Developer Intern

- Completed a hands-on Web Development internship, contributing to CampusNexus, a full-stack college management platform, under professional mentorship.
- Built and debugged web components and UI features, completing all assigned technical tasks to the organization's satisfaction.

Technical Skills

Languages: C, C++, HTML5, CSS3, JavaScript, Python
Web Development: React.js, Node.js, Express.js, MongoDB
Tools & Platforms: GitHub, VS Code, Vercel, Render
Databases: MongoDB
Core CS Concepts: Data Structures, Operating Systems, Computer Networks

Projects

CampusNexus — Full-Stack College ERP Platform | *React.js, Node.js, Express.js, MongoDB* | Live Demo

- Built a unified full-stack ERP platform for colleges, consolidating announcements, events, club communication, complaints, and internal mail into one secure, role-based web application for Students, Faculty, and Admins.
- Implemented JWT-based authentication with role-based access control and engineered real-time features — live club chat, typing indicators, and instant notifications — using Socket.IO over persistent WebSocket connections.
- Designed a decoupled client-server architecture (React frontend, Express REST API, MongoDB Atlas database) deployed on Vercel and Render for production-grade accessibility.

CitySolve — Civic Technology Platform | *Node.js, Express.js, MongoDB Atlas, Kotlin (Android)* | Live Demo

- Built a multi-platform civic complaint management system — web app, native Android app, and cloud backend — bridging citizens and municipal authorities in real time, with GPS-based reporting, live map/issue pins, a contractor module, and an analytics dashboard.
- Secured the platform with JWT authentication, bcrypt password hashing, and role-based access control for Citizens, Authorities, and Administrators, with real-time push notifications via Firebase Cloud Messaging.
- Won 1st Place at the Smart Citizen Reporting & Urban Issue Management System Hackathon (2026) for this project.

Personal Portfolio Website | *React.js, Tailwind CSS* | Live Demo

- Built a fully responsive personal portfolio with React.js, Tailwind CSS, and Framer Motion animations, featuring a splash screen, an AI chatbot assistant, project modals, and a resume viewer.

Certifications

Hackathon Winner — 1st Place, CVM University Hackathon 4.0 - 2026 — **2026**
Institution's Innovation Council (IIC) & SSIP, A. D. Patel Institute of Technology

Web Developer — Internship Completion Certificate — **2026**
